1. Tick boxes in the table to show which properties of copper make it so useful for each application.
2. One of the columns will be correct for every application in the house. Which one is it?

Printing of copper circuit tracks directly onto thin flexible plastic is making small, lightweight and very low cost electronics possible. Copper is only deposited on the tracks. This minimises waste. (Courtesy of Conductiveinkject.)

Copper Development Association is a non-profit organisation that provides information on copper's properties and applications, its essentiality for health, quality of life and its role in technology. It supports education through a collection of resources spanning biology, chemistry and physics. These materials have been developed in conjunction with the Association for Science Education, and reviewed by teachers.
