

NOTICEBOARD

British Science Week

British Science Week runs from 8 to 17 March 2019. Packs to support your planning around their

theme of 'Journeys' are available from: www.britishsienceweek.org.

They have 'How to...' guides, which will help with the organization and running of

an event, how to achieve an event on a shoestring budget as well as things like photography permission slips – it is all there to help you to host the most fabulous event!

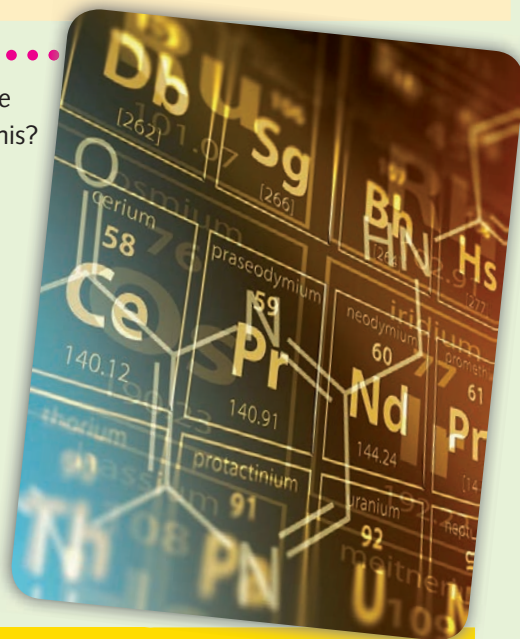

International Year of the Periodic Table

The year 1869 is considered as the year of discovery of the Periodic System by

Dmitri Mendeleev. The year 2019 will be the 150th anniversary of the Periodic Table of Chemical Elements and has therefore been proclaimed the 'International Year of the Periodic Table of Chemical Elements (IYPT2019)' by the United Nations General Assembly and UNESCO. Find out more at: www.iypt2019.org

How imaginative can you be with this?

- Can you adopt some Periodic Table information into your science lessons?
- Could this be a theme for your science club?
- Could this link with British Science Week this year?

Dare to dream

Dreaming of the new, the bright, the improved, the applied? The joy of science and its benefits are being eroded but we can all think about what innovation and creativity could bring, and share our thoughts and musings. The Business of Science Innovation Awards 2019 are designed to encourage submissions from people who want to solve problems through science, or who want science to solve problems. It may include product proposals, processes or simply ideas that should have been thought of and applied already in our world.

There are three age categories, including 0-11, and shortlisted entries will be presented at the Business of Science Conference on 16 May 2019 in Leeds. Prizes include cash for school and organisational winners,

publicity, co-creation opportunities, support for product development and a trophy – on top of the kudos of putting it out there!

Will you dare to dream?
