

Safeguards in the School Laboratory (Twelfth Edition)

By the ASE Health & Safety Specialist Group

Member Price £20.00

The 12th edition of this invaluable ASE publication is intended for all those involved in 11-19 science education. It will be particularly useful for newly qualified and trainee teachers, new technicians and those seeking promotion to, or newly appointed as, heads of department, senior technicians, etc.

Safeguards in the School Laboratory seeks to provide an overview of health and safety issues in science education; it flags up areas where there are significant misconceptions and where problems commonly arise, and draws attention to situations which, although rare, may have serious consequences. It does not replace detailed health and safety advice or risk assessments provided by CLEAPSS and SSERC on behalf of employers; it does, however, alert readers to those occasions when they need to be careful and check those details. We believe it should be read from cover to cover, even if some parts are skipped over at a first reading.

This edition has been updated where legislation has altered, for example on chemical hazards and radioactivity, or where school practice has changed.

All members of the ASE's Health & Safety specialist group are experienced teachers, technicians, advisers or consultants, several of them currently or formerly working for CLEAPSS or SSERC.

Beneath Strange Stars

By Various Authors

Member Price £9.35

Age 16+

Explore strange worlds, timelines, and fantastical beings with this collection of 35 short stories and poems. All proceeds are donated to ASE.

About TL;DR Press

TL;DR is a writers' community and publisher, focused on connecting writers with growth opportunities and creating anthologies for charity. They are dedicated to providing an inclusive platform to writers of all ages, genders, races, and sexualities.

They strive to have a positive impact in the wider world. They are a registered charity, with proceeds from each publication going to a nominated charity that either ties in with the publications theme, or has ties to a literary cause.

Other charities that TL;DR Press has worked with include: Doctors Without Borders, The Endometriosis Foundation of America, The Pilcrow Foundation, The Kempe Foundation, and True Colors United.

The 2019 ASE Science Book of the Year Award

The winner of the 2019 ASE Science Book of the Year Award was announced at the Members' Reception at the ASE Annual Conference in Reading in January. We are pleased to congratulate Jules Pottle and Rufus Thomas, whose book *The Molliebird* was the overall winner. We are also delighted to congratulate Ruth Owen and Shan White whose book *The Problem with Plastic* received our first ever Highly Commended award. The two other shortlisted runners-up should not be forgotten and are also listed below. Full details of all four books were featured in the November 2019 issue of *EiS*.

WINNER

The Molliebird

Jules Pottle and Rufus Thomas

ISBN: 9780995481169

Member Price: £6.80

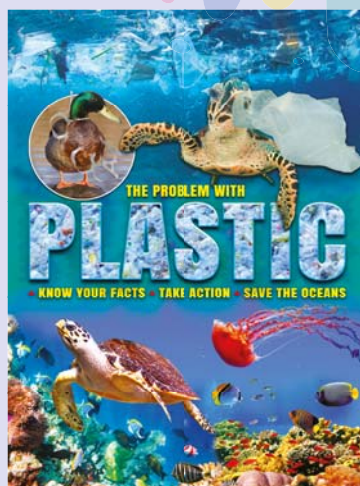

Beautifully written and illustrated as a narrative poem, *The Molliebird* tells the story of natural selection.

After a natural disaster that leaves her badly camouflaged in her surroundings, the bright blue Molliebird becomes desperate for her babies to survive.

Jules and Rufus receive their award
