

## Index by title

- A biology educator's perspective on 'life' (376) 36
- A dream of a table (374) 33
- A periodic obsession (374) 60
- A periodic table obsession somewhat satisfied by dressing up as Mendeleev (374) 43
- A simple demonstration of the danger of an overloaded electric circuit (376) 12
- A STEM activity to make a 'teaching and learning pencil case' (376) 13
- A STEM project to make a light gate controlled by a Raspberry Pi (374) 9
- An Elemental Spectacle: A Guided Tour of the Darker Reaches of the Periodic Table* (375) 80
- Approaching the 'big questions' of middle-years school biology through the thinking of C.H. Waddington (376) 40
- Beautiful rings of light formed by reflection (377) 17
- Breaking a rod: combining impulse and inertia (377) 56
- Bridging the skills gap from GCSE to A-level (375) 10
- Bristlebots – are they alive? Epistemic insight workshops using small things to ask big questions (376) 33
- Calcium – nature's messenger (374) 36
- Can a robot think for itself? Helping young people to ask big questions about human and electronic personhood (376) 47
- Celebration of Assessment for Learning: 20 years inside the black box (375) 6
- Citizen scientists: school students conducting, contributing to and communicating ecological research – experiences of a school–university partnership (376) 67
- Competency through challenge: schools' partnerships to stimulate creativity and develop skills (375) 42
- Coronavirus (COVID-19): trying to understand the information being supplied to the public (376) 6
- Deconstructing scientific vocabulary for low-literacy students: an action research study (377) 81
- 'Don't know much about a science book': do children and young teens read science books for pleasure? (377) 73
- Doppler shift in light: help needed [Helpdesk] (377) 25
- Drying of gases: calcium chloride and ammonia (376) 11
- Easy differentiation (374) 20
- Environmental education through STEM (375) 31
- Four more demonstration experiments (377) 14
- Genetics for tomorrow's world (375) 26
- Has the time come to use near-infrared spectroscopy in your science classroom? (376) 60
- How can research support learning in science? (374) 81
- How heavy is your pet dinosaur? (377) 45
- How to balance the equations of chemical reactions (377) 41
- How you and your students can contribute to scientific research (375) 43
- Hydrogen – an element for the Space Age! (374) 51
- Increasing student completion of long-form questions using bullet-point prompts (377) 64
- Introducing the epigenetic landscape into middle-years biology teaching (377) 32
- Iodine and its biological function in humans (375) 60
- Joseph Priestley – the dissenting chemist (374) 56
- Learning the assignment of structures to oxoacids of phosphorus through a new strategy (377) 37
- Making Materials Matter (374) 24
- Making STEM for everyone: reaching under-served audiences (375) 19
- Marine engineering and multidisciplinary approaches to address challenges on the high seas (376) 30
- Molecular nitrogen: inert but essential (375) 63
- O<sub>2</sub>, O<sub>3</sub> and O<sub>2</sub>: the key to life on the Earth (375) 65
- Observing social distancing and social behaviour [Responding to coronavirus (COVID-19) in public and within education] (377) 7
- Physics demonstrations for observation [Responding to coronavirus (COVID-19) in public and within education] (377) 9
- Plug and learn: online labs for next-generation learning experiences (375) 36
- Potassium – the essence of life (375) 57
- Practical ways to illustrate some science topics at home [Responding to coronavirus (COVID-19) in public and within education] (377) 10
- Recognising the long table and using it to make a folding (or 'concertina') periodic table (375) 77
- Royal Institution mathematics Masterclasses: a sixth-form-to-primary connection (375) 14
- Science teachers' lack of understanding of the nature of science: does it matter? Part 1 (377) 58
- Should hydrogen go with carbon in the periodic table? (374) 63
- Some thoughts on the periodic table when reflecting on the International Year of the Periodic Table (375) 47
- Surface tension and electrolyte investigation (374) 6
- Sweet sustainable science (374) 12
- Taking photographs of the 'beautiful rings of light' (377) 18
- Teaching the periodic table: a short review of the literature (374) 65
- The case for including epigenetics in the school science curriculum and trainee science teachers' views about its implications for society (377) 27
- The Engineering Ed project: dealing with failure and the robotic future – engaging students in multidisciplinary STEM learning (376) 51
- The fascination of a chemical escape room at school (374) 26
- The fuel–oxygen system [letter] (377) 6
- The inevitable periodic table (375) 68
- The infrared camera as a pedagogical tool in science education (376) 75
- The mathematical structure of space and time – the very, very easy bits! (374) 15
- The nuclear legacy: dealing with waste and decommissioning (377) 50

- The periodic table of danger (375) 70  
 The periodic table of medicine (374) 71  
 The rise and fall of strontium as a therapeutic agent and the importance of pharmacovigilance (374) 40  
 The rubber universe (375) 40  
 The transition elements of life (375) 52  
 The truth behind the headlines: thinking critically about healthcare advice (375) 24  
 The use of *VPython/GlowScript* to model chemical phenomena (376) 79  
 Theme editorial: Science, engineering and big questions (376) 16  
 Theme editorial: The periodic table (374) 31, (375) 45  
 Thinking like a scientist in a multidisciplinary arena: the case of Renoir's painting (376) 19  
 Toys that can foster engagement and improve understanding (377) 20  
 Understanding gaps in teacher interpretation of formative assessment evidence (377) 67  
 Using waste and recycling as a way in to the periodic table (374) 47  
 Why did the *Titanic* sink? – bridging two disciplines to teach epistemic insight with lower secondary school students (376) 25
