

Contents

Number 167 | March/April 2021

- 3 **Focus on... Science in the humanities**
- 4 **Notice Board**
- 5 **In conversation with... Professor Chris Lintott**
Leigh Hoath talks to **Professor Chris Lintott**, University of Oxford academic and presenter of *The Sky at Night*, about his school and education experiences
- 7 **Supporting global goals: the Little Litter Legends**
Emma Smith outlines how her school has focused on sustainability
- 10 **Lava or vinegar? How science models can create misconceptions**
Rachel Linfield and Christine Holbrey consider the misconceptions that can result from common practical work demonstrations
- 12 **The significance of scientific discoveries and events**
Sarah Brown suggests a pedagogic tool to support discussion of the significance of scientific discoveries
- 15 **Read all about it! Science and history: the perfect combination for creative science teaching**
Michele Grimshaw and Kathy Schofield outline how history and science can be linked to develop even better teaching
- 17 **Science Swap Shop**
- 21 **How is the weather today?**
Carol Bostrom describes a cross-curricular approach to studying weather that enthused her class
- 24 **Why use the outdoors?**
Alison Murphy explores how we can enable children to experience nature in a meaningful way
- 28 **The right CPD for the right teacher at the right time**
Bryony Turford and Lynne Bianchi consider the role of the Network Guardian – a new approach trialled to gauge the depth of impact of professional learning
- 32 **Hands-on experiments to teach basic heat concepts**
George Stylos and Konstantinos T. Kotsis present four experiments to teach about heat that require only everyday materials
- 36 **Reviews**

Cover: A cross-curricular approach to weather – page 21
