

Contents

Number 170 | Nov/Dec 2021

- 3 **Focus on... remote learning**
- 5 **Taking science home**
Nicola Saporita-Clark outlines how the COVID-19 pandemic created an opportunity to communicate with children and parents differently and keep them engaged with science
- 8 **Exciting remote practical science**
Sarah Sisson explores how practical work can be done remotely and what has been learned through the COVID-19 pandemic
- 11 **It is all about adaptation: surviving in a changing environment**
Rebecca Price tells how she adapted her science teaching during the COVID-19 pandemic to survive the new environment
- 14 **The opportunities provided by COVID-19 for science teaching**
Mark Levesley considers the teaching and learning that can stem from the COVID-19 pandemic
- 17 **You can do virtually anything if you need to**
Paul Tyler highlights some of the ways in which virtual learning can take place and how he maintained 'visitors' and 'visits' throughout the pandemic
- 19 **Taking science lessons into the future**
Katie Nicholds outlines how virtual reality headsets support learning
- 21 **Science Gateways: increasing science capital by supporting home activities**
Jen and **Steve Smyth** discuss how the COVID-19 pandemic completely changed the way one project communicated with children, parents and teachers
- 24 **In it together: the primary science pedagogy dichotomy**
Ben Rogers and **Leigh Hoath** consider the extremes of enquiry and direct instruction with a view to providing high-quality science for primary pupils
- 27 **Improving science capital using Mantle of the Expert**
Rebecca Towner-Yates enhances science capital using the 'Mantle of the Expert' approach
- 30 **Can playing table-top role-play games help children learn?**
How can a game such as *Dungeons and Dragons* support children in primary science? **Lewis Morgan** and **Ian Turner** explain
- 34 **Reviews**
Cover: Remote practical science – page 8

Primary Science

Editor **Dr Leigh Hoath**

Science at home – page 5

Adapting our science teaching – page 11

Virtual reality in the classroom – page 19

Enhancing science capital – page 27
