

# Contents

Number 159 | Sept/Oct 2019

- 3 **Focus on ... Science behind the wow**
- 4 **Notice Board**
- 5 **To WOW or not to WOW?**  
**Tom Pringle** (aka Dr Bunhead) explores the use and abuse of 'wow' in the classroom and suggests why using the wow is not as straightforward as it may seem
- 9 **Moving a wow to an understanding: demystifying science**  
**Alison Eley** and **Sue Martin** discuss the possible pitfalls of some commonly used wow moments and offer suggestions for how to ensure that they support learning
- 15 **The science behind the 'wow' factor of outdoor learning**  
**Helen Spring** outlines how learning outdoors certainly has the 'wow' factor but also enhances science teaching and learning when carefully planned
- 18 **It is what comes after the wow that counts**  
**David Allen** explores how moments of awe and wonder can provide opportunities for real science learning
- 22 **Making the most of your 'wow' science visitor**  
**Dr Helen Waterhouse**, workshop provider from Palaeoquest, considers how to get the most from your wow visitor
- 26 **Moving from 'wow!' to 'why?'**  
**Danielle Hearne** from the Zoological Society of London finds the wow in the simplest activities
- 28 **An introduction to the Primary Science for All (PSfA) project**  
**Joelle Halliday**, PSfA Project Leader, contextualises the next two articles, written by teachers who were involved in the project
- 29 **Could using frames make science more accessible for children with special learning requirements?**  
**Sam Kenny** tries out the Primary Science for All 'Frames for Focus' approach
- 32 **'It makes learning more fun': how Frames for Focus and Wonder Cupboards support inclusive science teaching**  
**Kate Heaton** outlines Primary Science for All resources and ideas designed to raise engagement in science for pupils with special educational needs
- 36 **Reviews**

Cover: **Dr Bunhead** creates a wow moment – page 5
