3 Focus on... A different world?

4 Notice Board

5 Inclusive lockdown science

Sarah Bearchell considers how children with SEND can be supported with learning science at home and shows some of what goes into the creation of 'home-schooling' materials

8 Wax wraps are the bee's knees!

Sue Thomas outlines how making beeswax wraps can support learning science in school or at home

11 Let's do science!

Theodoros Pierratos and **Anna Koumara** explore teaching the nature of science through inquiry-based activities on electric circuits

14 Learning about STEM careers through science and drama

Rebecca Riley uses drama and role-play to provide a context for science learning and teach about STEM careers

17 Science Swap Shop

Activities for learning about rocks and soils

21 ExtraOrdinary Spaces: engaging pupils with real-world engineering

Rose Edmonson outlines how children and teachers are engaged in a hands-on engineering challenge to enrich their STEM learning

25 Meteorite impact! Applying maths and English skills to a science investigation

Andy Markwick and **Megan Wright** describe a cross-curricular investigation into meteor impacts in the engaging context of craters on the Moon

30 Increasing science capital by building relationships between industry and the local community

The team at **CIEC** outline how science capital can be developed through their Children Challenging Industry programme
